

## TRACING THE GROWTH OF THE GLOBAL COMMUNITY: A POPULATION FOAECASTING ANALYSIS

Group Leader:

- M.Sabarinathan

Group Members:

- S.Gokulkrishna
- G.Ramakrishnan

Team Id:

\*NM2023TMID25694

Team Size:

\* 4

- M.Moorthi

## Introduction :

The world population is more than three times larger than it was the mid twentieth century. The human population reached 8 billion now .In 1950 the population is less then 2.5 billion people. The population growth after 1950 's is very High it is reached 7.5 billion in 2015.It will reach the 10 billion people in the year of 2050. We predict the population growth of future in this project.

## Activity:1

- The first task we completed is **Empathymap** and **brainstorm** and **idea prioritization**. It contains many ideas and what we do for the solution and what does we feel anything we written in that maps. **Empathymap** shows the what we says , think and what you feel about this and what does we do for it. Idea prioritization and brainstorm map shows what the solution for this problem and ideas for the solution of this problem.

# Empathy map:

## Says

What have we heard them say?  
What can we imagine them saying?

population  
increasing is  
one of the way  
to world  
destruction

it will affect  
the animal  
foodchain and  
animal  
livelihood

## Thinks

What are their wants, needs, hopes,  
and dreams? What other thoughts  
might influence their behavior?

It will show the  
tremendous  
developmet of  
medical field

I think there  
are pros and  
cons

pros is our  
medical and  
science field is  
development

corn is it creat  
the food  
,water and  
living place  
scarcity

we need to creat  
awarness among  
people about the  
caused by  
population  
growth

we should create awarness  
the people to adopt and  
raise orphaned children  
instead of resorting to  
medical centers for child  
birth so that the orphaned  
children who are contolled  
by population growth will  
also get adopts

I feel fertility  
centres is the  
reason for this  
population  
growth and it has  
scam too

one child per  
family should  
be forced to  
prvent  
population  
growth

This scam  
main reason  
is money and  
baby desire

## Does

What behavior have we observed?  
What can we imagine them doing?

## Feels

What are their fears, frustrations, and  
anxieties? What other feelings might  
influence their behavior?

# Brainstorm and idea prioritization :

**Brainstorm**

Go to the next slide and click on the 'Brainstorm' button to start the brainstorming session.

0:50 minutes

**Group ideas**

Take an existing group of ideas and group them into categories. This will help you to see the relationships between ideas and to see which ideas are most important.

0:20 minutes

**Idea Prioritization**

## Activity:2

- The activity 2 is **data collection** from the data base.

UN population data - Excel (Product Activation Failed)

Country or Area	Year	Area	Sex	City	City type	Record Type	Reliability	Source Year	Population	Value Footnotes
Land Islands	2013 Total	Male	MARIEHAMN	City proper	Estimate - de jure	Final figure, comp		2014	5445

## Activity:3

- Prepare the data for a visualization. Clean the data and patterns in the data set. It is useful to create easily the visualization graphs in the tableau.

## Activity:4

- Data visualization is the 4<sup>th</sup> task of this project.
- No of visualization is created by us to understand the data easily and find the solution for the problem.

The trend of sum of Population for Year.

The trend of sum of Population for Year. Color shows details about Sex.

### Cities with highest avg populations

Average of Population for each City. The view is filtered on City, which keeps 50 of 4,213 members.

### Countries with highest avg population from 2000-2014

Country or Area. Color shows sum of Population. Size shows sum of Population. The marks are labeled by Country or Area. The view is filtered on Country or Area, which has multiple members selected.

## Population by city type

Population  
6,189,282,491

City type  
■ City proper  
■ Urban agglomeration

City type (color) and sum of Population (size).

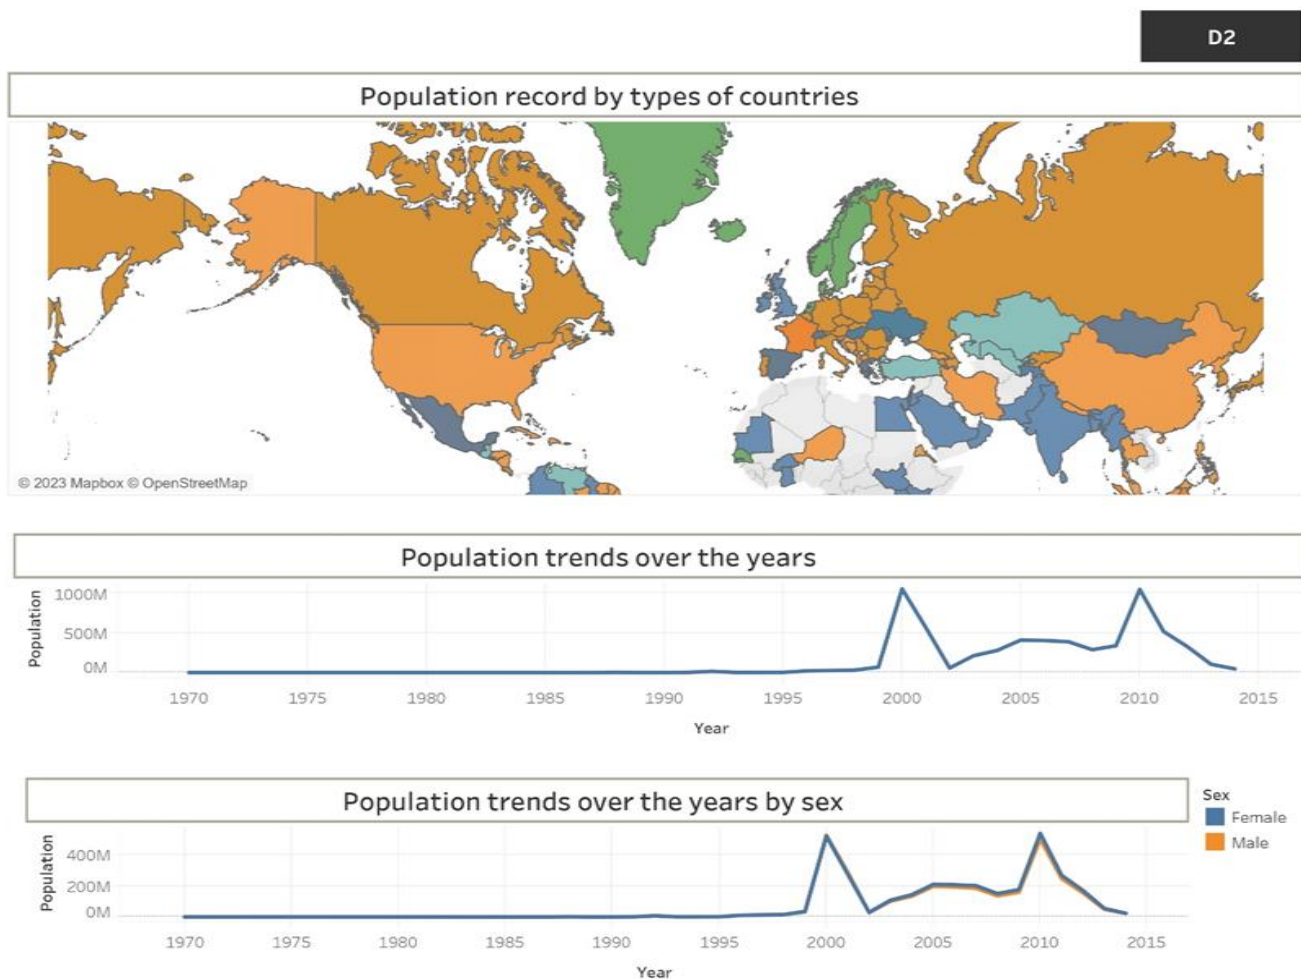

## Population of citted by year

City	Country or Area							
	Australia	Brazil	China	India	Singapore	South Africa	United King..	United Stat..
Abaeteluba		163,802						
Aberdeen							212,125	
Aberdeenshire							226,871	
Abilene (TX)								232,993

Albuquerque (NM)								1,592,650
Albury-Wodonga	586,088							
Aldershot							243,344	
Aletai			178,510					

Sum of Population broken down by Country or Area vs. City. The data is filtered on Year, which ranges from 1978 to 2014. The view is filtered on Country or Area, which keeps 8 members.

## Activity:5

- Create the **Dashboard** and put into the visualization graphs. The dashboard is a group of visualization graphs. Dashboard is help to understand quickly the visualizations.

D3

## Cities with highest avg populations

## Countries with highest avg population from 2000-2014

## Population by city type

## Activity:6

- Story writing is the 6 task of our project. The story portion is very important . The each graphical representation have separate meanings. We are written a story for these graphs it is easy to understand it for audience.

### Story 1

This bar chart shows the highest average population of cities. The most population city is Shanghai with a population of 7 million followed by Mumbai with a population of 7 million.

This tree map shows the highest average population of countries of year 2000 to 2014. China has highest population of 588M.

This pie chart shows the population by city type. It shows the urban avg population and city avg population. City has a 4.6 billion population and urban has a 1.5 billion population.

This text table shows the countries population cited by year. China and India has so many cities and having a 50% of population in the world.

This geographic map shows population.

This line chart shows the population tronds over the year by sex . Before 2000 male population is higher then female.After 2000 the female populalon is higher then male,this is the population trend.

## **Advantages:**

- One of this advantage is **people support**.
- The birth percentage is increase because of the **Medical field Evaluation**.
- So many kinds of scientific inventions are made by humans because of these population increases.

## **Disadvantages:**

- Main disadvantage is this population growth is **scarcity of water, food, living place, livelihood products etc....**
- War between the countries for livelihood scarcity.
- Global warming , joblessness , poverty etc.....

## **Conclusion:**

- The solution for this problem is reduce the child birth.
- Country governments are forcing the family to have one child is enough.
- Create awareness to the people about the caused by the population growth.

**Thank you**
